

Brady Manning

Strategic Infrastructure Product Leader Building the Future of Distributed Energy

[linkedin.com/in/brady-manning](https://www.linkedin.com/in/brady-manning) | bradymanning.com | github.com/bpmanning

Strategic & technical product leader with 10+ years of experience building grid-interactive infrastructure software across distributed energy resources, virtual power plants, managed charging, energy markets, and utility-scale orchestration systems. Deep expertise with ISO wholesale and utility market structures, DERMS platforms, energy optimization, and commercialization of emerging energy technologies.

Proven track record leading 0→1 product development, scaling grid services platforms, launching utility, OEM, and retail energy partnerships, and translating complex technical systems into commercially successful products.

EXPERIENCE

GoodLeap — Staff Product Manager, Grid Services

Mar 2025 – June 2026

Led product strategy and execution for distributed energy orchestration and virtual power plant platforms supporting grid services. Owned the entire DERMS platform, mobile app energy features, and web experience.

- Scaled GoodLeap's distributed energy orchestration platform from 0 to 150+ MW, coordinating 20,000+ residential energy assets across multiple ISOs and utility territories. Built energy features in the GoodLeap Home app with 700k active users.
- Owned roadmap and delivery of a next-generation DERMS platform including automated enrollment, event scheduling, post-event analytics, fleet account management, and real-time operational optimization and dispatch insights.
- Led integrations with Tesla, Enphase, FranklinWH, SolarEdge, EnergyHub, Uplight, and other DER providers to support real-time dispatch, telemetry management, and coordinated asset control.
- Built GoodLeap's end-to-end VPP orchestration and reporting engine supporting SOC tracking, dispatch optimization, automated settlement reporting, and performance analytics.
- Achieved 96% participation rates through optimized event operations, customer engagement improvements, and scalable product operations workflows.
- Directed commercialization strategy for grid-services partnerships including Reliant/NRG, David Energy, and the launch of GoodGrid retail energy offerings in Texas.
- Hired and managed Product Operations function supporting utility coordination, operational reporting, and scalable execution of grid-services programs.
- Created 3 distinctive algorithmic dispatch strategies to respond to varying grid conditions and program constraints.
- Developed a functioning retail energy web app using Figma Make, connected 15+ third-party APIs and webhooks. Full-stack with deployed infrastructure including data validation and payment processing.

Fluence Energy — Senior Technical Product Manager, Platform

2024

Led platform software initiatives for utility-scale battery energy storage systems and global operating system modernization.

- Led global rollout of Fluence OS7 control and dispatch software projected to support approximately \$5 billion in projects.
- Directed three agile teams of 22 employees across software engineering, architecture, design, and QA focused on platform integration, UI modernization, deployment tooling, and commissioning automation.
- Led migration strategy and stakeholder alignment across 225 energy storage projects totaling 11.1 GW worldwide.
- Coordinated cross-functional execution among 80+ stakeholders spanning engineering, operations, deployment, and commercial teams.

General Motors (GM Energy) — Senior Product Manager

2023 – 2024

Owned multiple energy management products spanning electric vehicle V2X utility managed charging products, Emissions Intelligence platform, and Microgrid Command Center.

- Launched utility smart charging programs with DTE, Duke Energy, Eversource, NHEC, NRG, SMUD, and Xcel Energy.
- Increased program participation by 60% by establishing a business model worth 300% more than previous utility contracts.
- Designed GM's Virtual Power Plant customer experience including APIs, scheduling systems, notifications, analytics, and product operations tooling.
- Launched a B2B emissions analytics and EMS platform with estimated 2024 profit contribution of \$8M.
- Led GTM strategy, utility and regulatory analysis, customer requirements, sales enablement, and contract negotiations.
- Managed scoping of EV charger technical integrations and OEM relationships.

NRG Energy — Manager, New Business Incubation**2019 – 2023***Led incubation and commercialization of emerging distributed energy and intelligent demand response products.*

- Served as business lead for an intelligent demand response mobile application that optimized home energy usage based on ERCOT wholesale electricity pricing signals.
- Led a cross-functional team of 16 across engineering, research, design, and marketing with responsibility for a \$2.6M annual budget.
- Drove strategic partnership development with Honeywell Resideo for smart thermostat integration.
- Validated 33 product hypotheses through customer interviews, surveys, concept testing, and usability research.
- Accelerated beta launch by three months, reducing third-party development costs by \$110K.
- Executed GTM experiments including microsites, digital campaigns, pricing validation, and acquisition funnel optimization.

Product Manager, Innovation

- Led sustainability and distributed energy product initiatives across renewable energy certificates, community solar, retail energy products, and energy brokerage services.
- Directed cross-functional teams across six departments to sunset underperforming business lines and reduce annual costs by \$203K.
- Led customer research, pilot programs, and experimentation initiatives to validate product-market fit and refine long-term product strategy.

Senior Data Analyst

- Analyzed wholesale market pricing, settlements, bidding strategies, demand forecasting, and trading operations for NRG's supply and trading organization.
- Improved a \$350M load forecast through enhanced analytics, forecasting tools, and automated intelligence systems.
- Reduced annual operating costs by approximately \$2M through forecast optimization and improved WMAPE performance.
- Built analytics suites and automation tools using Python and modular workflows supporting 1M+ customer migrations.

Entergy — Product Manager | Analyst III | Analyst II**2015 – 2018**

- Built flexible infrastructure capabilities within MISO using backup generation assets as dispatchable grid resources for large commercial customers resulting in savings of hundreds of thousands of dollars in product waste during outages.

Academy Sports + Outdoors — Pricing Analyst | Customer Experience Team Lead**2010 – 2015**

EDUCATION**HEC Paris**

Master of Science (M.S.), Innovation & Entrepreneurship

Texas A&M University

Bachelor of Science (B.S.), Economics | Minor in Business Administration

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Clean Energy Leadership Institute (CELI) Fellowship - 2025
- Certified Scrum Product Owner (CSPO) | Certified Scrum Master (CSM)
- Reforge Alumni - Mastering Product Management & Growth
- Business & Financial Modeling Specialization - University of Pennsylvania, Wharton

ADDITIONAL INFORMATION

- Startup Mentor & Judge — MassChallenge
- Toastmasters Leader & Public Speaker (30+ speeches)
- Ultra-running and marathoner | Read 50+ books per year for the last decade | Eagle Scout
